Wild Robot Week 2: Application

**LO: I can summarise in purposeful contexts in a variety of subjects.**

Think about what you know about Robots from the text and write a guide to looking after a Rozzum.

**MUST:**

**Your guide must refer to your knowledge gained from the text (e.g. powering up with the sun, avoiding water, etc)**

**SHOULD:**

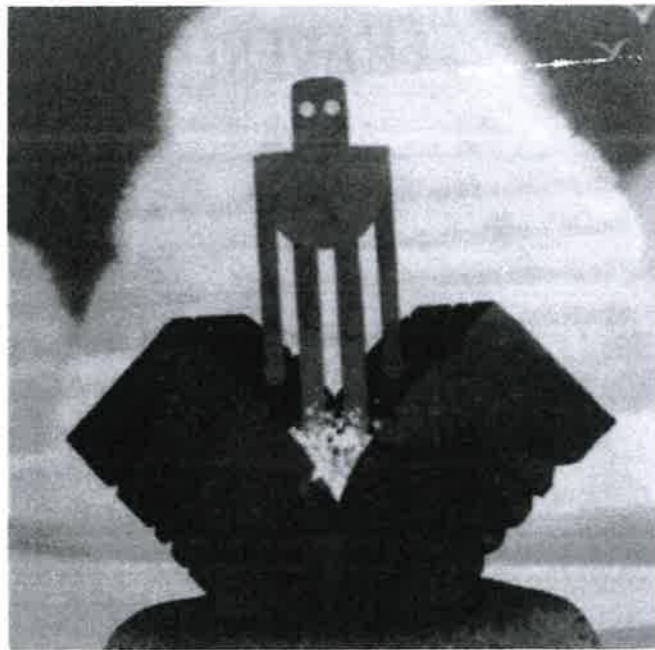

Your guide should have a useful layout that helps the reader to navigate the information you provide.

**COULD:**

Your guide could include inferred information which isn't in the text.

Rozzum unit A1

An A1 Rozzum unit is a housework unit. It comes in a <sup>crate</sup> crate but you cut the crate in half and press the 'on' button on the back.

Every day, a Roz A1 unit has to be in the sun for 2 hrs on low power mode so that it can charge. On its left arm, there is a socket so that you can plug it in with the charger (sold separately).

For safety, keep away from water and pine cones as both can ruin the robot's AI.

An A1 unit can learn from anything <sup>that</sup> on what it

is asked to.

The Rozzum unit only works 359 days every 4 years. Make sure when you go to sleep to turn it 'off' because when Roz is not on, the timer will stop.

Every 1 year, the robot has to go for a M.O.T so that it is kept in good working order.

If you have a problem go <sup>call</sup> to 00000 0000 or go to [www.robotsworld.co.uk](http://www.robotsworld.co.uk)

NO REFUNDS

✓ Excellent use of summary skills to produce your guide.

Is the robot safe around water?
