

# ! How to look after a Rozom!

Welcome to the guide of how to look after the brilliant and great Roz! In this guide you will learn how to look after the well and new robot (Rozom).

## Dangers:

Here is a list of dangers that you should be AWARE of:

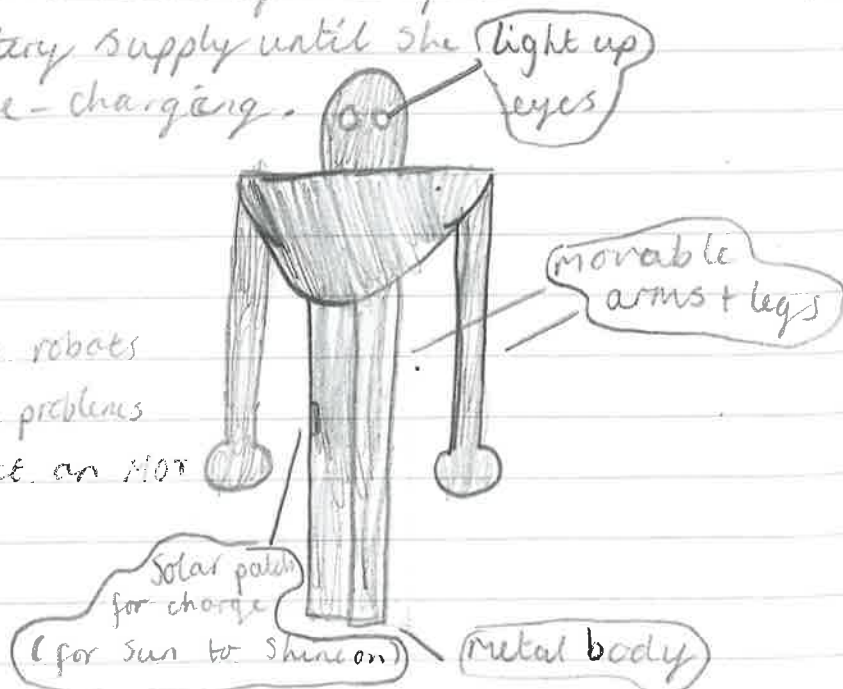

- Water - it can lead to serious problems!
- Bears - she gets them really mad!
- Otters - she scares them
- Caves - she will end up getting chased by whatever/whichever lives in there!
- LOL! • pinecones - you don't want to know

## Power:

Roz gains power from the sun as she is solar powered. You don't need any chargers or wires for this mechanical friend! For charging her, leave her out in the sun or take her sun-bat<sup>th</sup>ing with you! She needs up to 5 hours of charge. It takes 12 hours a weeks worth of battery supply until she light up turns off ready for re-charging.

## Beware

These state of the art robots are refundable! If any problems are found, please contact our MOT for Garage!

Notes:

• accessories sold Separately. OO
